Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Reissue Applications

Response to Amendment

The amendment filed November 20, 2006 proposes amendments to the claims that do not comply with 37 CFR 1.173, which sets forth changes shown by markings in reissue applications. A supplemental paper correctly amending the reissue application is required.

Pursuant to 37 CFR 1.173, any changes relative to the patent being reissued which are made to the specification, including the claims, upon filing, or by an amendment paper in the reissue application, must include the following markings:

(1) For any claim changed by the amendment paper, a ***parenthetical expression*** “amended,” “*twice* amended,” etc., should follow the claim number. At least claims 9-11 require the proper parenthetical expression.

(2) An amendment of a “new claim” (i.e. a claim not found in the patent, that was previously presented in the reissue application) must be done by presenting the amended “new claim” containing the amendatory material, and completely *underlining* the claim. The presentation cannot contain any bracketing or other indication of what was in the previous version of the claim. This is because all changes in the reissue are made vis-à-vis the original patent, and not in comparison to the prior amendment. Although the presentation of the amended claim does not contain any indication of what is changed from the previous version of the claim, applicant must point out what is changed in the “Remarks” portion of the amendment or by a marked-up copy of the amended claims. Also, per 37 CFR 1.173(c) and as noted above, whenever there is an

amendment to the claims there must also be supplied, on pages separate from the pages containing the changes, ***the status*** (i.e., pending or canceled), as of the date of the amendment, of all patent claims and *explanation* of the support in the disclosure of the patent for the changes made to the claims.

Applicant is notified that any subsequent amendment to the specification and/or claims must comply with 37 CFR 1.173. See MPEP 1453.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor, at the time the application was filed, had possession of the claimed invention. There is no support in the original specification for the amendment to the claims. For example, the following subject is deemed new matter: Regarding claim 1, "each longitudinal knife having a smaller cross section than the size of each opening, the longitudinal knives being loosely disposed in the openings with a relatively large play". Regarding claim 7, "each opening being larger than the cross section of each longitudinal knife, the longitudinal knives having means for preventing the longitudinal knives from longitudinal movement relative to the transverse knives". Regarding claim 9, "the cross section of each opening in the longitudinal

knives is greater than the cross section of the pin to provide space in the openings around the pin". Regarding claim 10, "means for securing the longitudinal knives from longitudinal displacement relative to the transverse knives". Regarding claim 11, "each opening has a size greater than the cross-section of each longitudinal knife, the openings having recesses....". Regarding claim 12, "means for securing the transverse knives to the girders...a plurality of openings in alignment with the longitudinal knives...being arranged in pairs....the extension element joining pairs..." Regarding claim 17, "substantially preventing displacement...." Regarding claim 18, "means for preventing...." Regarding claim 19, "means for securing....", etc. This is a new matter rejection.

Applicant is reminded of the continuing obligation under 37 CFR 1.178(b), to timely apprise the Office of any prior or concurrent proceeding in which Patent No. 6,286,417 is or was involved. These proceedings would include interferences, reissues, reexaminations, and litigation.

Applicant is further reminded of the continuing obligation under 37 CFR 1.56, to timely apprise the Office of any information which is material to patentability of the claims under consideration in this reissue application.

These obligations rest with each individual associated with the filing and prosecution of this application for reissue. See also MPEP §§ 1404, 1442.01 and 1442.04.
